

John C. Halepaska and Associates, Inc. is a Colorado based water resources firm with over 22 years experience offering worldwide technical and managerial expertise.

We have extensive experience in providing surface and ground water-related services throughout the United States and internationally, including the Middle East, Canada, Australia, Central and South America. Much of this experience has been in support of permitting and regulatory affairs. We pride ourselves on providing timely, cost effective services that are specifically tailored to your needs.

We provide consulting to mining, municipal and industrial clients for:

- Mining-related hydrologic studies
- Surface water hydrologic studies
- Ground water hydrologic studies
- Environmental studies
- Water rights and adjudications
- Expert testimony
